

## Peel & Press Hanger

Peel & Press hangers are insulation pins used for attaching insulation to various base materials. The hangers are secured with a peel back adhesive tape. After the hanger is in place, the insulation is impaled on the hanger and secured with an insulation washer (speed clip).

- Nails are fully annealed (unless otherwise specified).
- Base is low carbon steel with galvanized plating.
- Stainless steel and aluminum are available as a special order.
- We carry a variety of washers in a variety of shapes, sizes and finishes.

Specifications	
Diameter	12 gauge
Length	3/4"-21"
