

## QUILTING PINS (SS CUPHEADS)

Quilting Pins are another name for cuphead pins made from 300 series stainless steel. They are available with or without insulating washers. The washers provide protection between the fastener and electrically conductive (foil faced) material. The insulating washers are available in a paper or tape style. The paper washers are oversized and are preferred for a "quilted" appearance. The tape washers are the same size as the cupped dish and are used as a less expensive alternative when the quilted appearance is not desired.

- "C" dimension: Diameter of the cuphead.
- "D" dimension: Diameter of the pin.
- "L" dimension: Overall length.
- All pins are fully annealed unless specified.
- Pins are available with or without paper insulators.
